

1000 Karat Blau  
AXEL SCHMID 2009/2016

1000 Karat Blau is a large impressive pendant lamp with the appearance of a lighting object. The shades, made of gold leaf and acrylic glass, reflect the light again and again and create an extraordinary warm atmosphere. A stunning piece for homes or other places designed to be welcoming and relaxing. As with the smaller 24 Karat Blau, part of Ingo Maurer's collection since 2005, short-wave blue light passes through the gold molecules, making the filament appear blue. Combine several 1000 Karat Blau to create unique clusters.

**Light source**

Socket E 27, max. 60 W. Compatible with bulbs of the energy classes A++ - E. For halogen or LED string bulbs.

**Technical data**

For 100 - 240 volts.

**More info**

Combine two or more 1000 Karat Blau to form an impressive cluster. The photo on the top shows two 1000 Karat Blau. Use 1000 Karat with 18 shades for clusters of at least two 1000 Karat Blau and the version with 20 shades for single installations. Available since November 2016.

**Colours**

Metal-framework in Red. Other colours on request.
