

Spoon

Antonio Citterio with Toan Nguyen

An original stool whose shape is as elastic in appearance as it is in function. The innovation of Spoon consists mainly in attaching the seat to a central support with a specially reinforced curve to guarantee flexibility and comfort. Furthermore, thanks to a sophisticated design solution, the gas lift pump adjusts the height between 56 and 76 cm and is perfectly inserted into the stem. In the same ingenious fashion, the handle which regulates the mechanism is perfectly concealed inside the seat. Spoon lends itself to any surrounding: kitchen benches, bars and fashionable, nonconformist-style restaurants.
